Purely energy efficient.

### Wide experience and versatile know-how.

➤ Koja Ltd. specialises in cost and energy efficient HVAC technology, air conditioning systems and fans for industrial processes that surpass expectations. We challenge ourselves from your starting points. We create the best solutions for all conditions, throughout their lifecycle. We help you in everyday situations with more than 80 years of experience. You can always trust our expertise.

### Responsible and innovative family business.

➤ Koja is a family business that was founded in 1935. We operate globally, yet like a family. We offer a wide range of air handling solutions and fans for buildings, ships and industry.

We strive to be innovative and reliable in everything we do. Responsible quality and sustainability are our core values and we continuously develop our operations. Our management system is ISO 9001:2008, ISO 14001:2004 and OHSAS 18001:2007 certified.

Yes, premium is possible.

### Invisible yet powerful.

➤ Koja Marine air conditioning systems improve energy efficiency and passenger comfort. We deliver reliable solutions for the entire ship, from design to training. As a leading HVAC supplier, we know how to provide unbeatable efficiency with a small footprint. We control all conditions on board.

### Comfort on the seven seas.

➤ As an industry leader, Koja designs efficient air conditioning systems that save costs. Our own R&D, automation and HVAC design teams provide state-of-the-art design.

Our equipment creates comfort in many ways. Their small footprint releases space for profitable use, such as cabins and passenger areas. You can trust our HVAC system design, production and commissioning quality throughout the ships life cycle.

MARINE

The bringer of fresh air.

### Reliable fresh air solutions.

➤ Koja's intelligent air handling solutions make construction processes easier. We create comfortable conditions and save your costs. We produce high quality indoor air in an energy efficient way and manage the equipment's life cycle. You will get excellent service, whether you are a designer or an end user. We keep our promises.

### We listen, and then make it happen.

➤ Koja's air handling for buildings features the latest technologies and leading innovations. We have our own R&D and production, with flexible operations.

You can optimise the energy and life cycle costs at the design phase with our advanced dimensioning and selection programs. When selecting our solutions you will get energy-efficient buildings cost-effectively.

BUILDINGS

Our technology meets the needs.

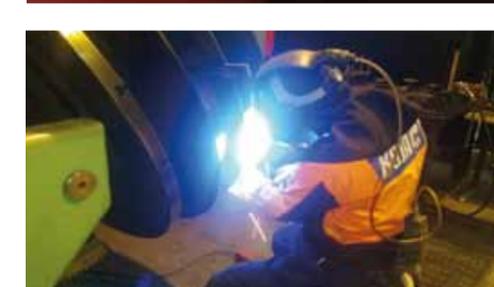

### Reliability of an expert.

➤ Koja designs a solution that fits your process like a glove. Individually optimised solutions ensure functionality at all times. You can trust the service of our professionals, beginning with product design, throughout the whole life cycle. We excel in demanding situations.

### We understand your processes.

➤ Koja offers reliable and effective solutions for demanding industry applications. Our reliable process fans are energy-efficient.

There are more than 20,000 of our fans operating around the globe. Tailored fan solutions are used continuously in pulp, paper, energy, metal and petrochemical industry. We continue to develop our product family for future purposes.

INDUSTRY

Know-how beyond expectations.

### We look ahead, saving your energy.

➤ Koja's Life Cycle Services provide safety and energy efficiency according to your requirements. Our team of professionals ensure the reliability of your air conditioning system throughout its life cycle. Our advanced way of working increases the value of your property. We act fast when you need our expertise. Trust us – we will save your energy.

### We are already thinking of tomorrow.

➤ Koja provides HVAC Life Cycle Services 24/7. You can rely on us throughout the system's life cycle in buildings, industry or on board – globally.

We have a wide range of spare parts for all product groups. Our services include installation supervision, preventive maintenance inspections, measuring, balancing and warranty handling. Our modernization solutions improve energy efficiency.
