

HiFEK ECO

High-efficiency
roof extractor

KOJA 

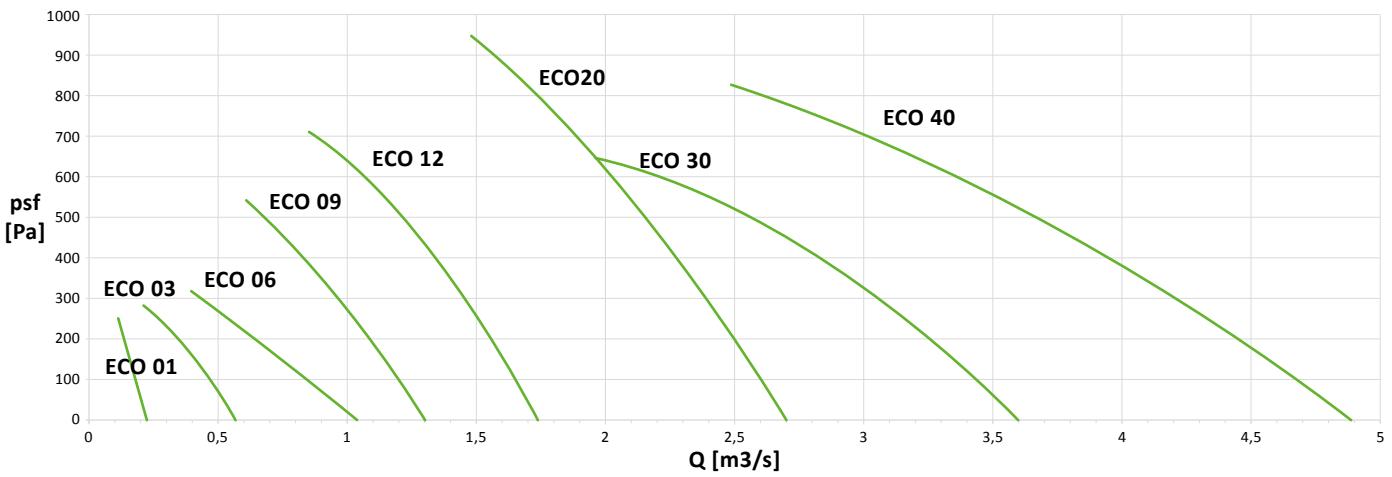

HiFEK ECO

Energy-efficient and silent extractor for office, commercial, public and residential buildings.

The airflow ranges of the **HiFEK ECO** roof extractor are divided more evenly compared to previous models. Our wide range of roof extractors covers every need, so you can produce better conditions to your site while saving energy – not forgetting a lower carbon footprint.

Airflow graphs of the HiFEK ECO range

Air volume up to 4.5 m³/s

Permanent magnet technology with an integrated frequency converter has been applied in the motor design of the **HiFEK ECO** roof extractor. Excellent efficiency is achieved with EC motors, and the rotational speed is controlled effortlessly.

- The motors are reliable and user-friendly.
- The enclosure rating is IP54.
- The output of the roof extractors varies from 0.1 kW to 4.4 kW. The basic model is wired and connected at the factory. The control line has a junction box to which all motor connectors are brought for easy access.
- The rotational speed can be controlled via the bus (Modbus) or using a voltage signal (0–10 V) from building automation. The roof extractor is designed to be user-friendly and easy to attach.
- The roof extractor models ECO 06–40 feature Modbus and the option for status information indication as standard.
- The ECO 01–03 models offer impulse data of the rotational speed as standard.

Thanks to the structure of **HiFEK ECO** roof extractors, the duct and the extractor are easy to clean and service. Installation accessories are included in the standard delivery. Standard models are manufactured from hot galvanised steel sheet. The best way to install the roof extractor is to use an HiFEP installation chimney, the standard casing of which is manufactured from a hot

galvanised steel sheet. Thermal insulation is mineral wool. The fire rating of the HiFEP installation chimneys is EI60 or EI120. The low-pressure dampers and feedthrough pipes for electric cables are installed at the factory.

Compact accessories for various needs and sites

- **Speed controller:** The HiFEK EC speed controller is used to adjust the desired fan speed simply with a potentiometer. If required, an external 230 V control can be used to select another speed. This accessory does not include a service switch.
- **Retrofit controller:** The HiFEK EC retrofit controller can be used to replace the existing 2-speed roof extractor with an energy-efficient EC fan using the old cables. This accessory includes a service switch.
- **Static pressure controller:** The controller enables pressure regulation in the duct of the roof extractor without external control. The pressure controller is used to set two duct pressure levels, and the integrated static controller is used to set the desired pressure level. This accessory includes a service switch.
- **Retrofit pressure controller:** The HiFEK EC retrofit pressure controller can be used to replace the existing 2-speed roof extractor with an energy-efficient EC fan and duct pressure control using the old cables. This accessory includes a service switch.

HiFEK ECO quick selection guide

HIFEK ECO 01

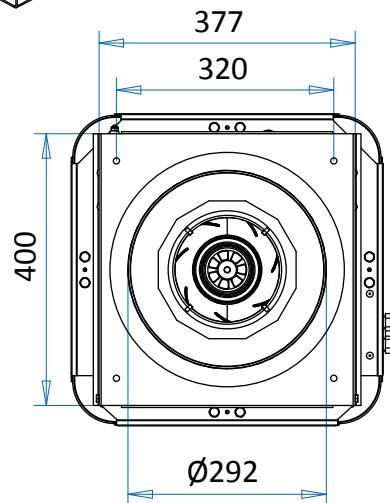

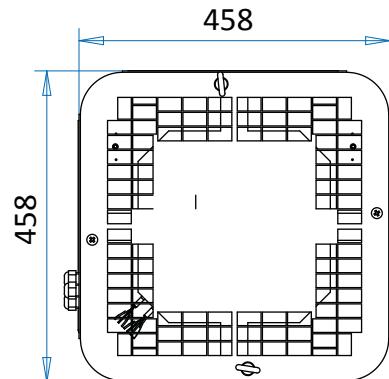

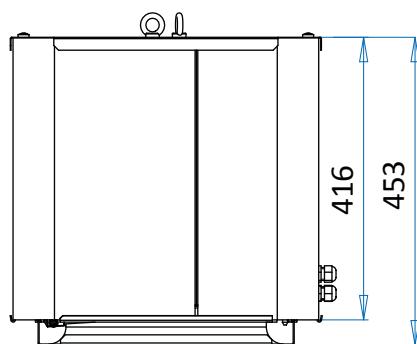

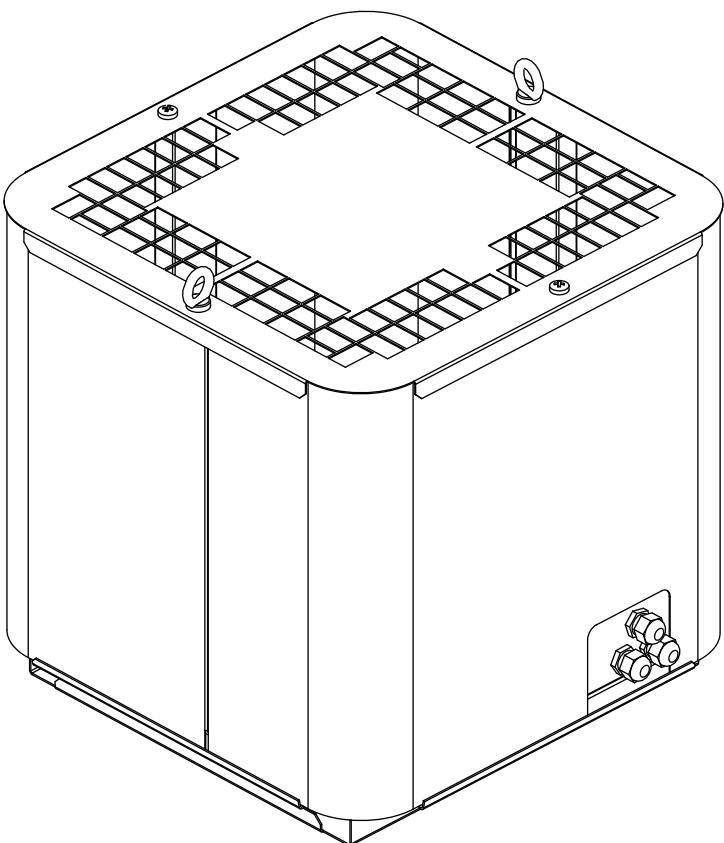

LVI number	7805032
LVI number (soundproof)	-
HiFEP LVI number*	7805102
*A support duct EI60, EI120 also available	

Nominal values:

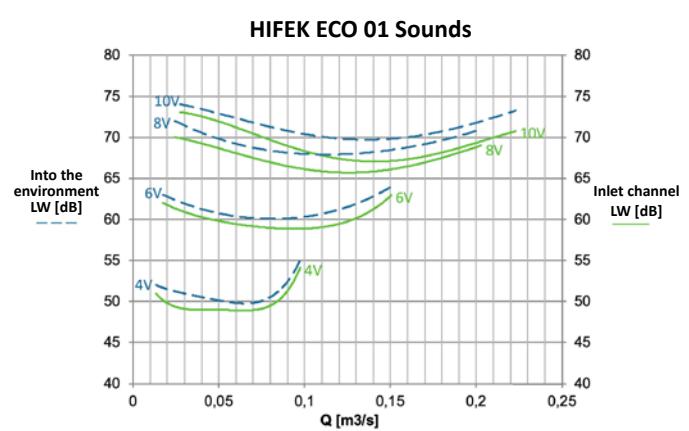

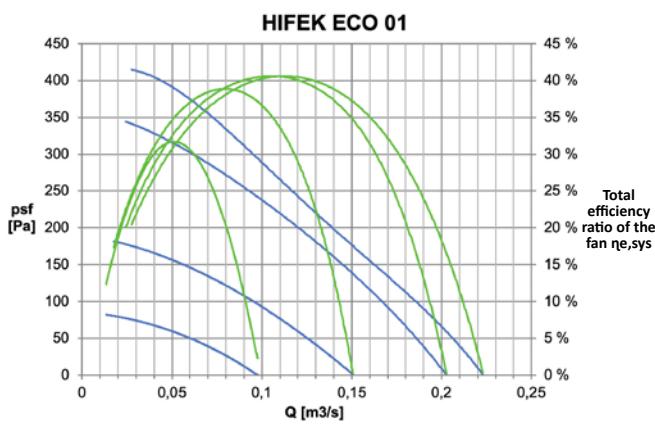

Rotational speed	2,580 rpm
Power	85 W
Current	0.7 A
Voltage	1 ~ 230 V
k value	54
Mass	13.6 kg

Attachment points:

HIFEK ECO 01 (gap 320 mm)
 → EC 03 / AC 03 / FEK 25

The sounds in the chart for the environment and suction duct are A-weighted total power levels.

Formula for the k value: $\frac{k \cdot \sqrt{\Delta p}}{1000} = [m^3/s]$, where Δp = differential pressure from the measuring nozzles of the fan (Pa)

HIFEK ECO 03

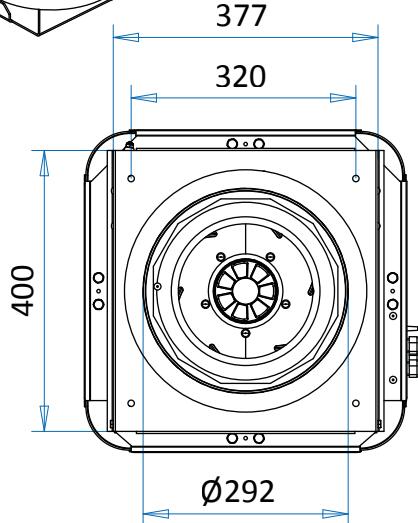

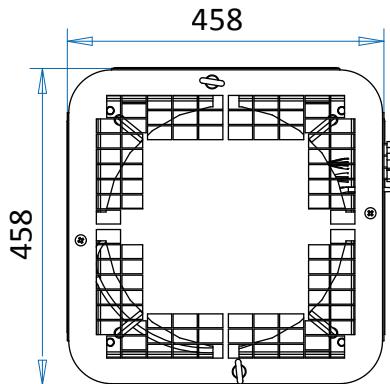

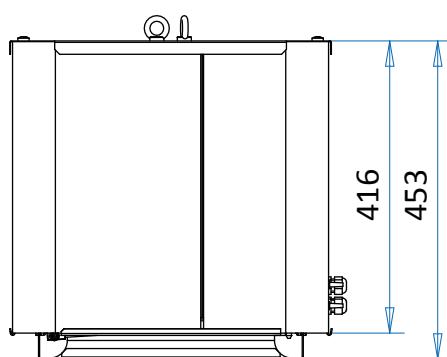

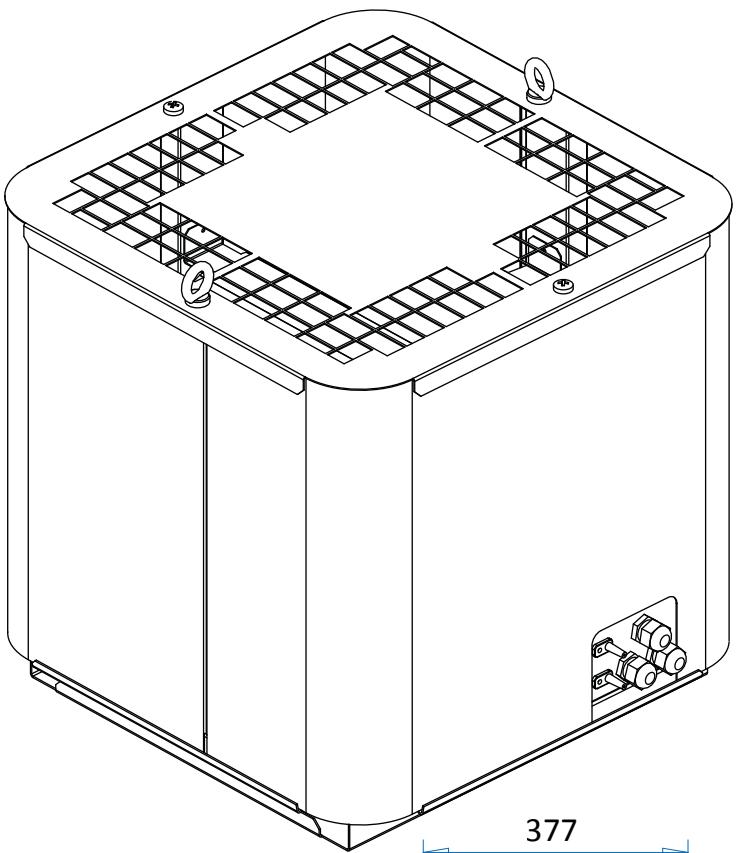

LVI number	7805033
LVI number (soundproof)	7805038
HiFEP LVI number*	7805102
*A support duct EI60, EI120 also available	

Nominal values:

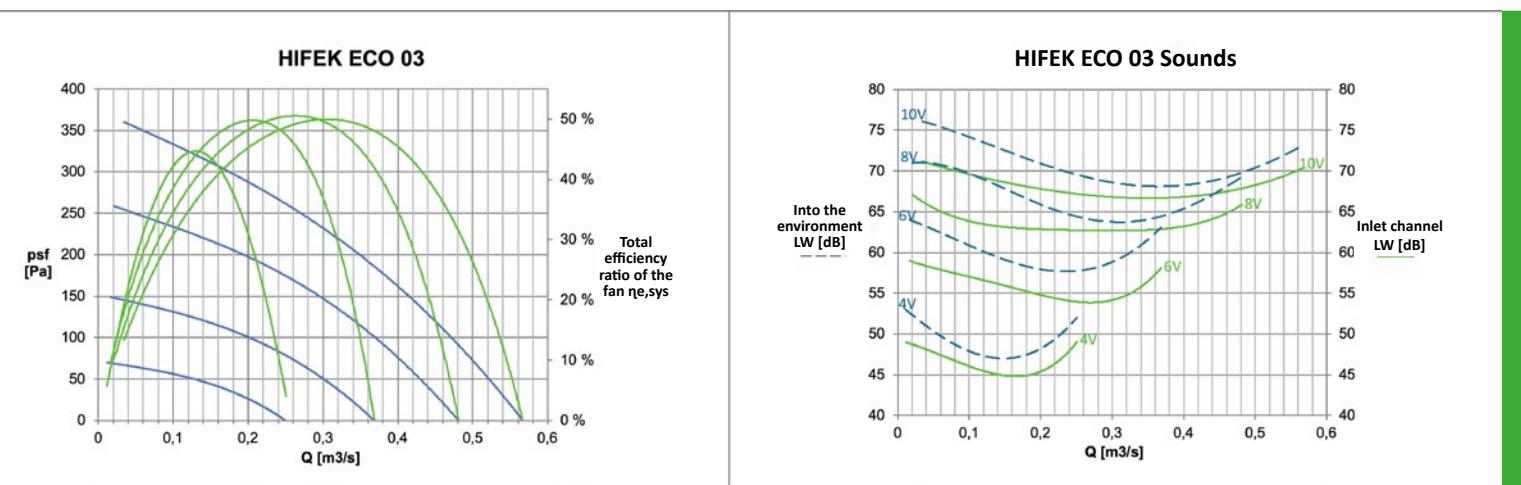

Rotational speed	1,525 rpm
Power	150 W
Current	1.2 A
Voltage	1 ~ 230 V
k value	93
Mass (soundproof)	20.6 kg (26.6 kg)

Attachment points:

HIFEK ECO 03 (gap 320 mm)
 → EC 03 / AC 03 / FEK 25

The sounds in the chart for the environment and suction duct are A-weighted total power levels.
 The sound-insulated model can reduce the sound power level to the environment by 5dB (A).

Formula for the k value: $\frac{k \cdot \sqrt{\Delta p}}{1000} = [m^3/s]$, where Δp = differential pressure from the measuring nozzles of the fan (Pa)

HIFEK ECO 06

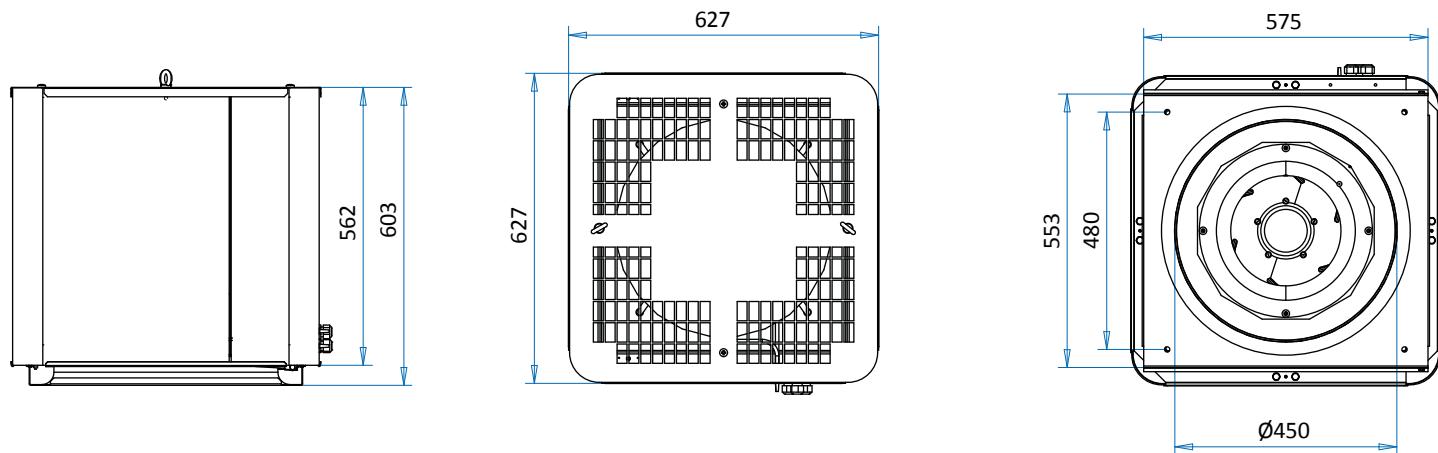

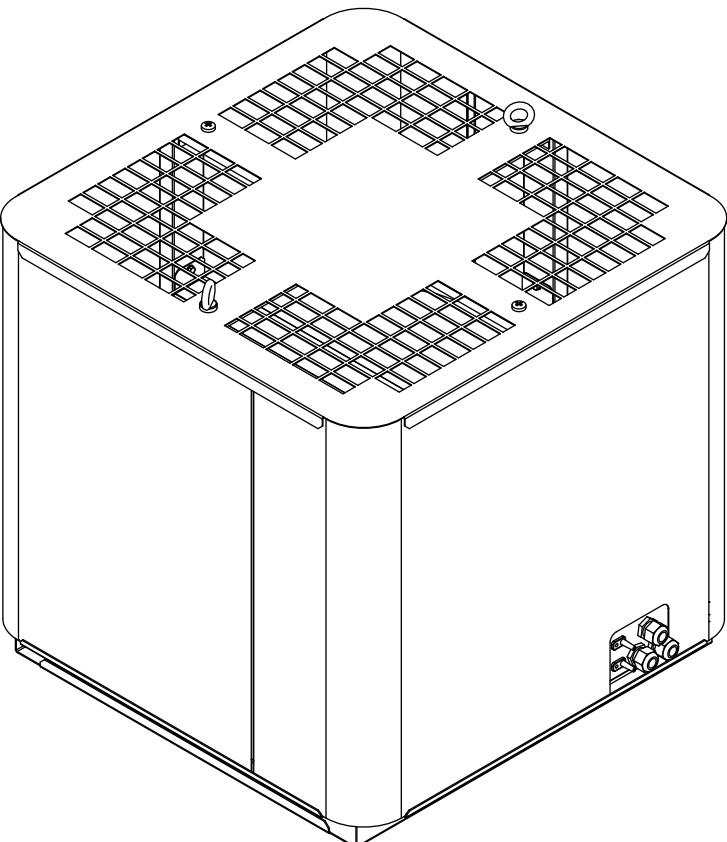

LVI number	7805034
LVI number (soundproof)	7805039
HiFEP LVI number*	7805104
*A support duct EI60, EI120 also available	

Nominal values:

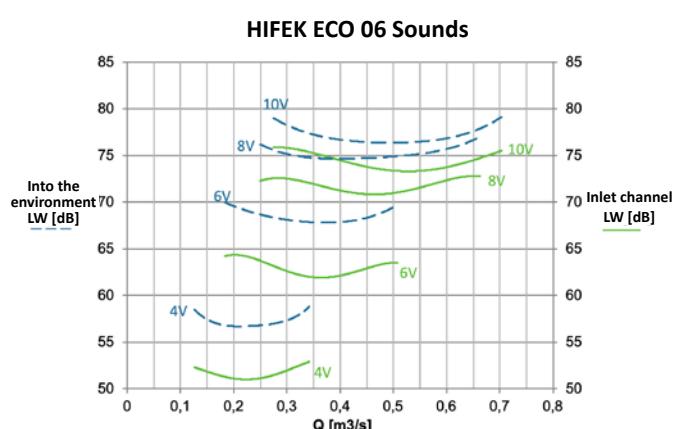

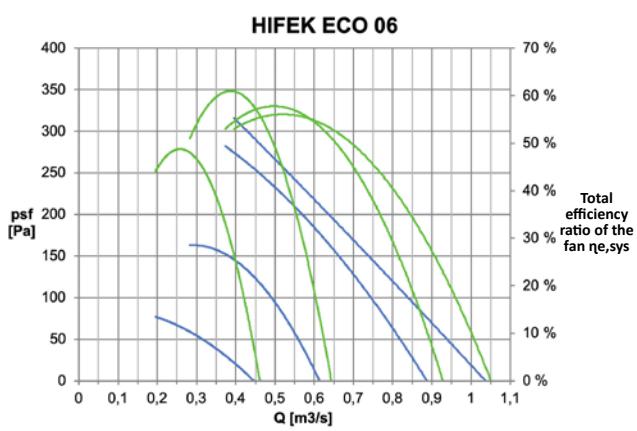

Rotational speed	1,450 rpm
Power	250 W
Current	1.1 A
Voltage	1 ~ 230 V
k value	128
Mass (soundproof)	33.0 kg (45.0 kg)

Attachment points:

HIFEK ECO 06 (gap 480 mm)
 → EC 06 / AC 06 / FEK 31

The sounds in the chart for the environment and suction duct are A-weighted total power levels.
 The sound-insulated model can reduce the sound power level to the environment by 5dB (A).

Formula for the k value: $\frac{k \cdot \sqrt{\Delta p}}{1000} = [m^3/s]$, where Δp = differential pressure from the measuring nozzles of the fan (Pa)

HIFEK ECO 09

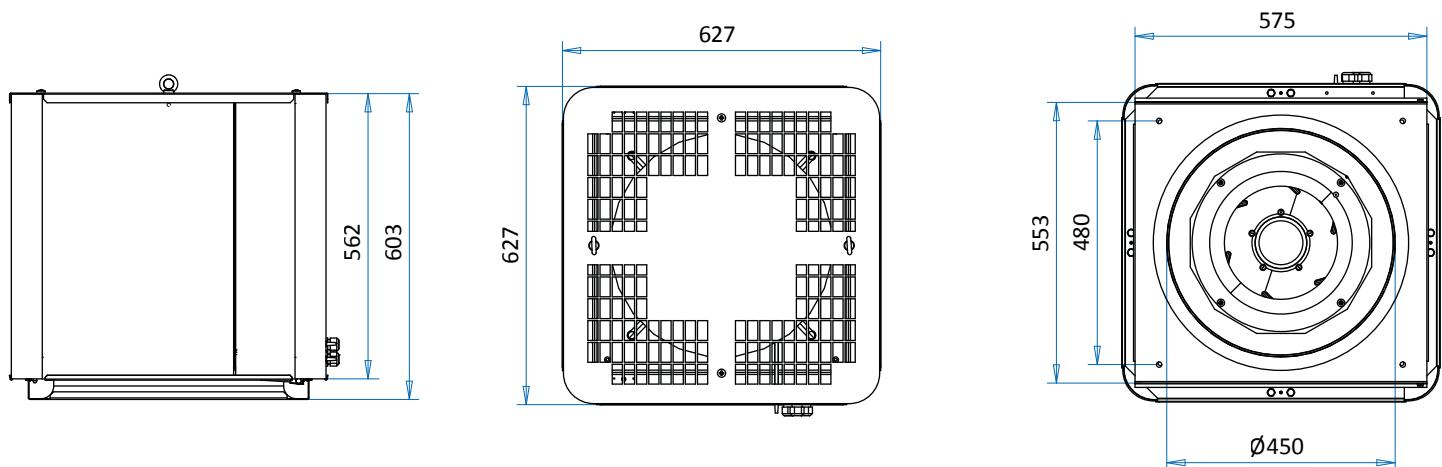

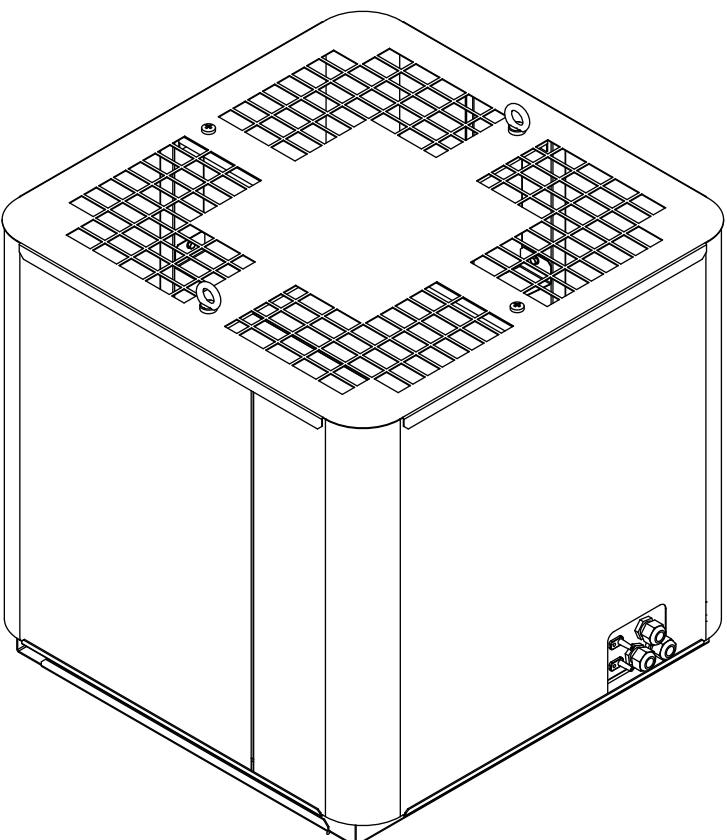

LVI number	7805035
LVI number (soundproof)	7805040
HiFEP LVI number*	7805104
*A support duct EI60, EI120 also available	

Nominal values:

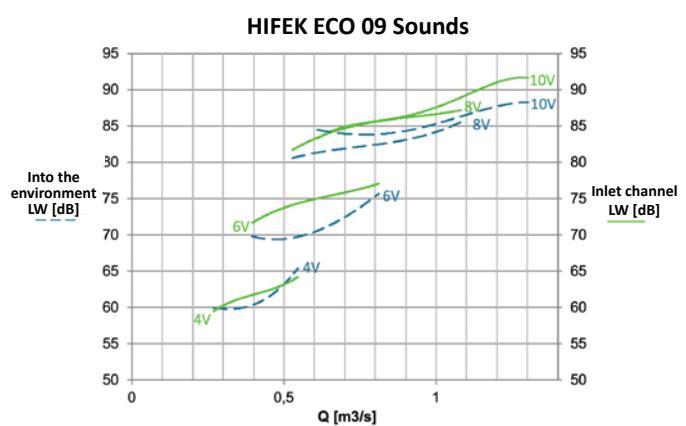

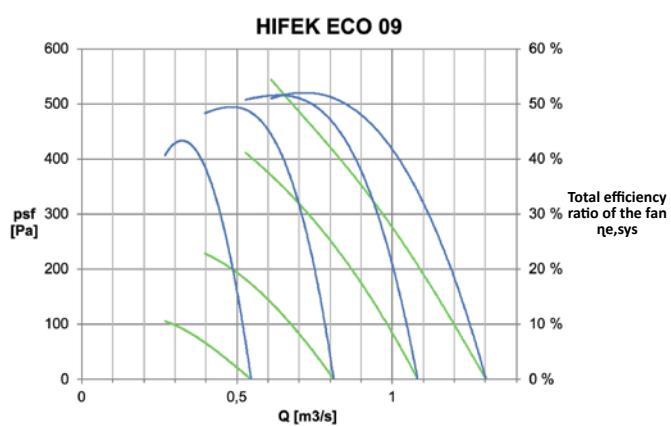

Rotational speed	2,100 rpm
Power	750 W
Current	3.3 A
Voltage	1 ~ 230 V
k value	128
Mass (soundproof)	37.2 kg (49.2 kg)

Attachment points:

HIFEK ECO 09 (gap 480 mm)
→ EC 09 / AC 09 / FEK 31

The sounds in the chart for the environment and suction duct are A-weighted total power levels.
The sound-insulated model can reduce the sound power level to the environment by 5dB (A).

Formula for the k value: $\frac{k \cdot \sqrt{\Delta p}}{1000} = [m^3/s]$, where Δp = differential pressure from the measuring nozzles of the fan (Pa)

HIFEK ECO 12

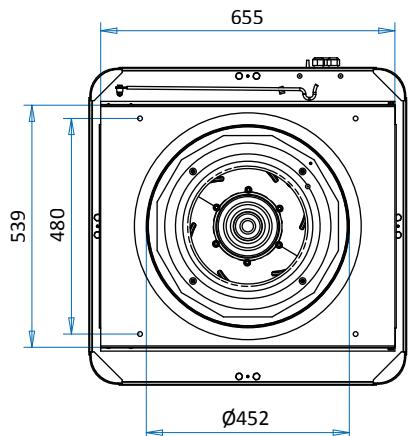

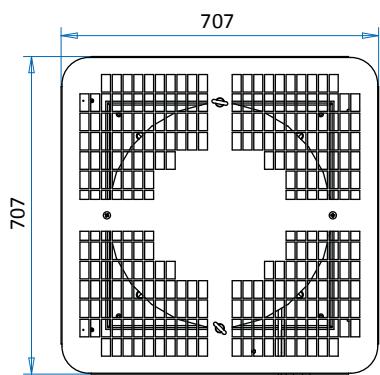

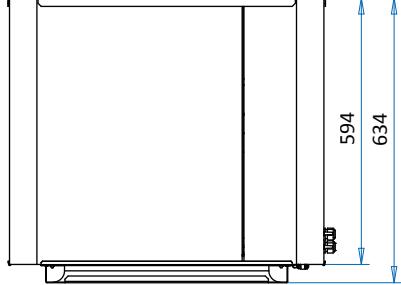

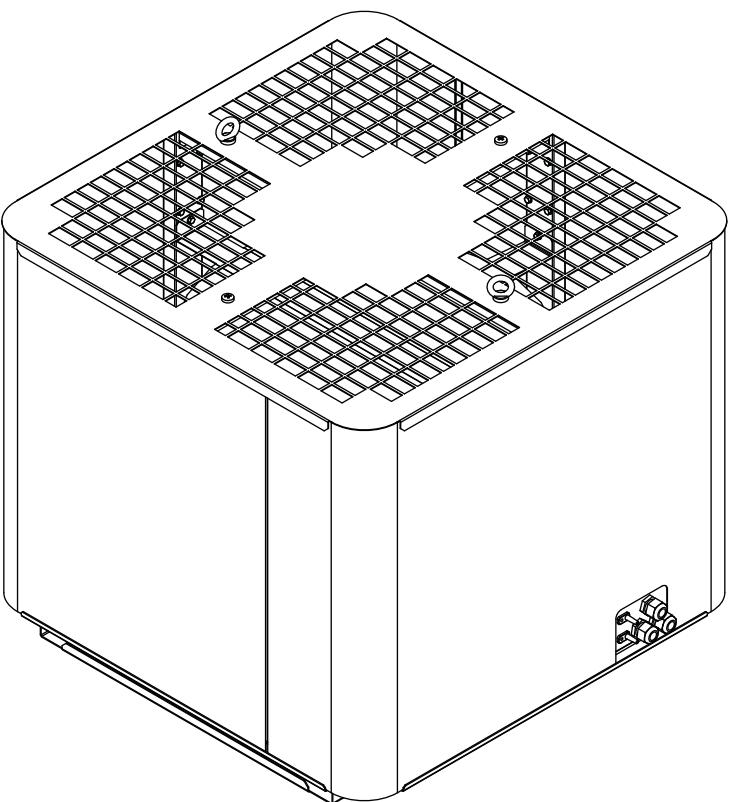

LVI number	7805036
LVI number (soundproof)	7805041
HiFEP LVI number*	7805104
*A support duct EI60, EI120 also available	

Nominal values:

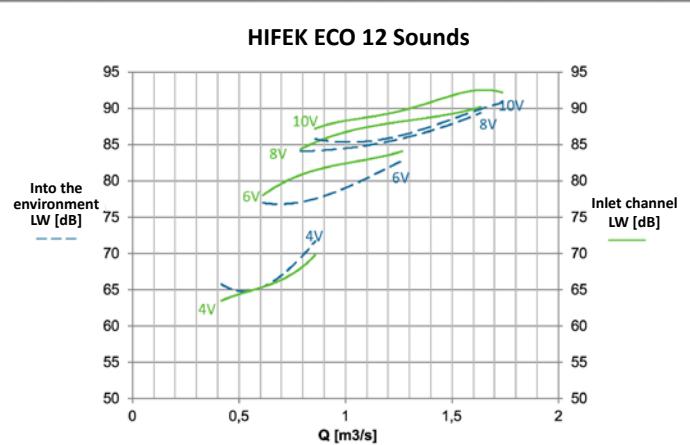

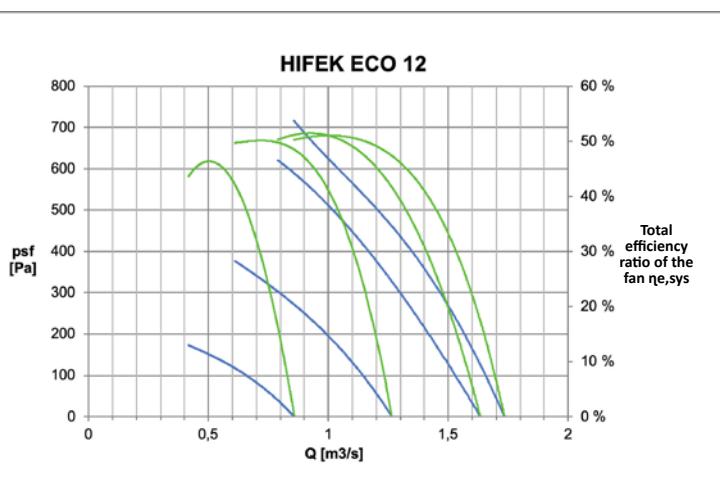

Rotational speed	2,060 rpm
Power	1,320 W
Current	2.1 A
Voltage	3 ~ 400 V
k value	180
Mass (soundproof)	47.2 kg (62.2 kg)

Attachment points:

HIFEK ECO 12 (gap 480 mm)
 → EC 12 / AC 12 / FEK 35

The sounds in the chart for the environment and suction duct are A-weighted total power levels.
 The sound-insulated model can reduce the sound power level to the environment by 5dB (A).

Formula for the k value: $\frac{k \cdot \sqrt{\Delta p}}{1000} = [m^3/s]$, where Δp = differential pressure from the measuring nozzles of the fan (Pa)

HIFEK ECO 20

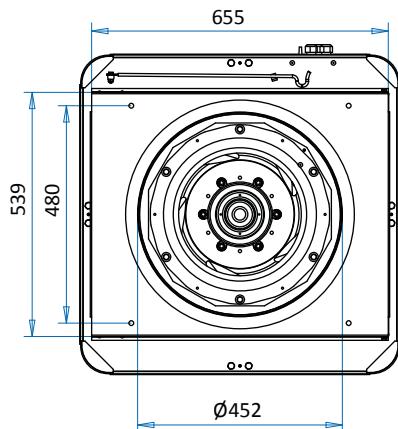

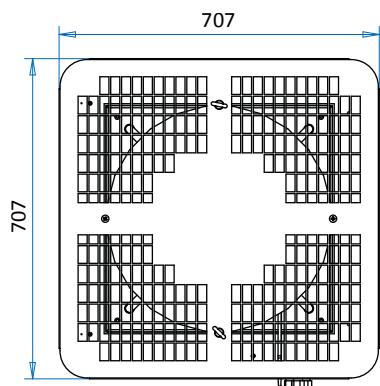

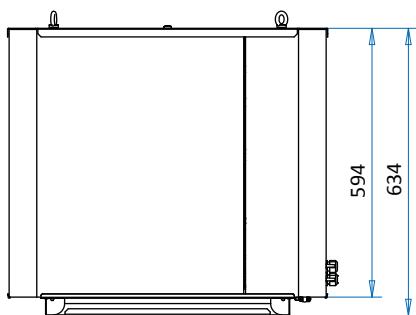

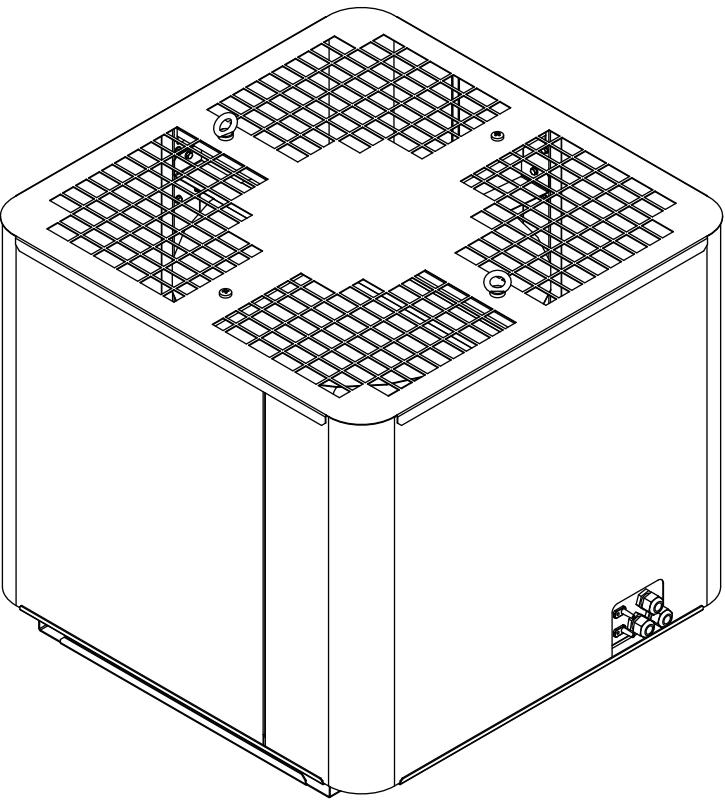

LVI number	7805037
LVI number (soundproof)	7805042
HiFEP LVI number*	7805104
*A support duct EI60, EI120 also available	

Nominal values:

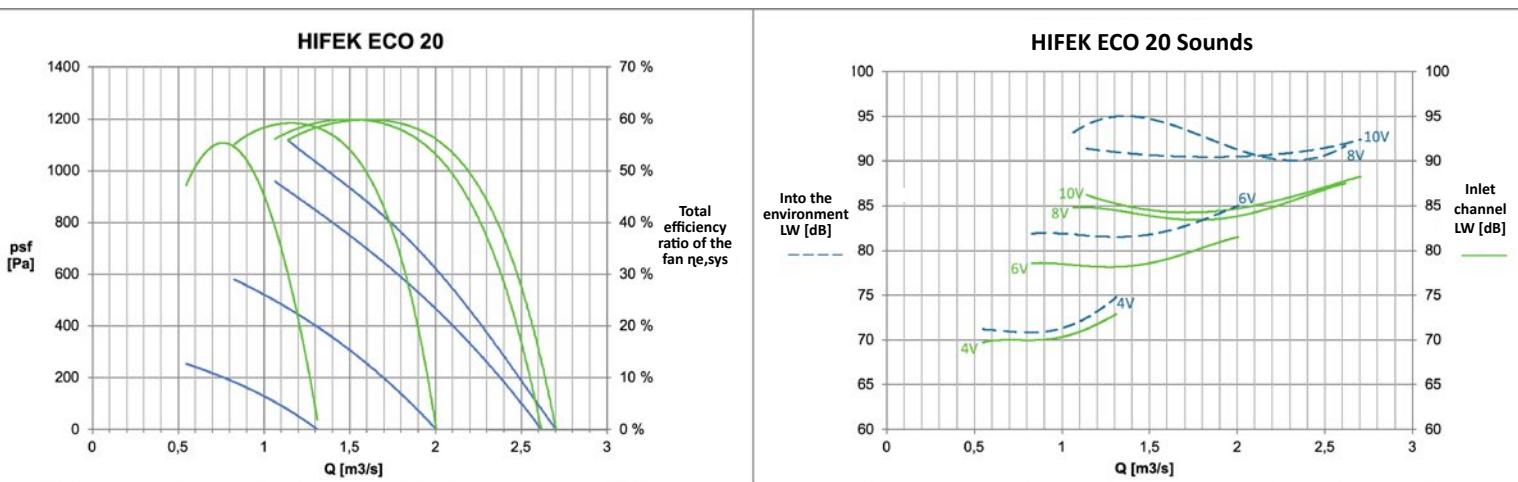

Rotational speed	2,450 rpm
Power	2,500 W
Current	3.8 A
Voltage	3 ~ 400 V
k value	188
Mass (soundproof)	59.4 kg (74.4 kg)

Attachment points:

HIFEK ECO 20 (gap 480 mm)
 → EC 12 / AC 12 / FEK 40

The sounds in the chart for the environment and suction duct are A-weighted total power levels.
 The sound-insulated model can reduce the sound power level to the environment by 5dB (A).

Formula for the k value: $\frac{k \cdot \sqrt{\Delta p}}{1000} = [m^3/s]$, where Δp = differential pressure from the measuring nozzles of the fan (Pa)

HIFEK ECO 30

LVI number

LVI number (soundproof) 7805043

HiFEP LVI number* 7805106

*A support duct EI60, EI120 also available

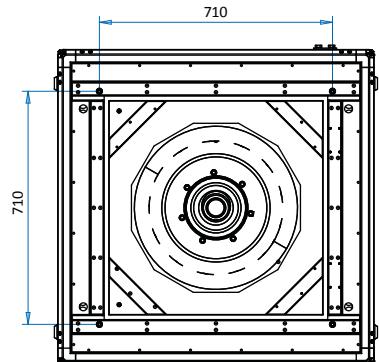

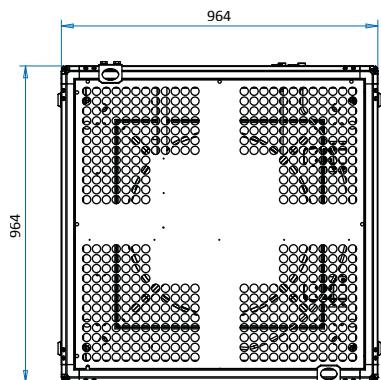

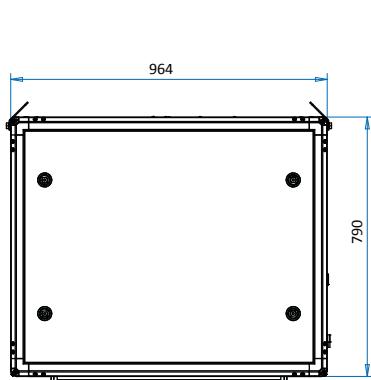

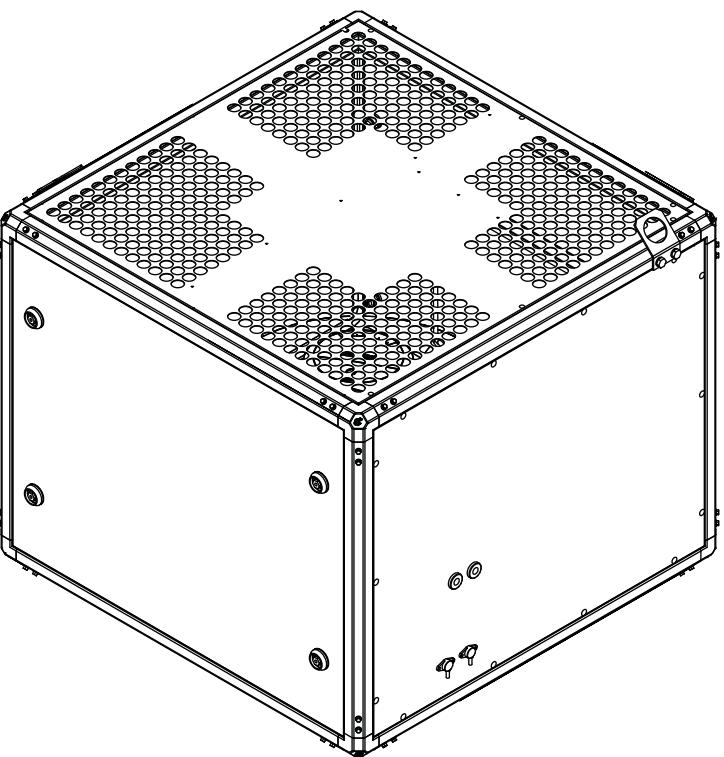

Nominal values:

Rotational speed	1,750 rpm
Power	3,500 W
Current	5.4 A
Voltage	3 ~ 400 V
k value	405
Mass	150.0 kg

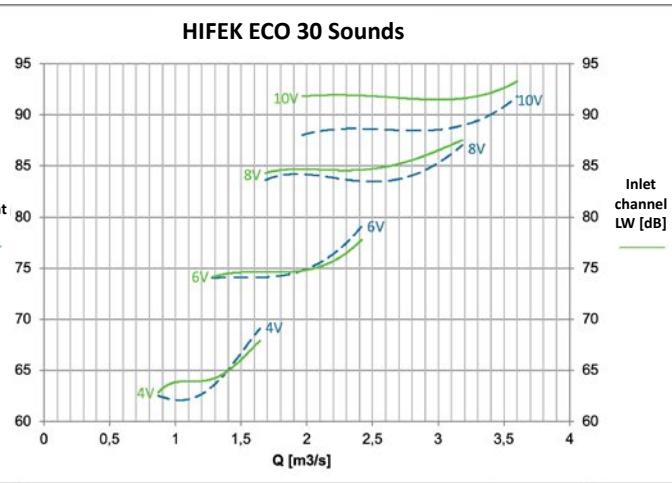

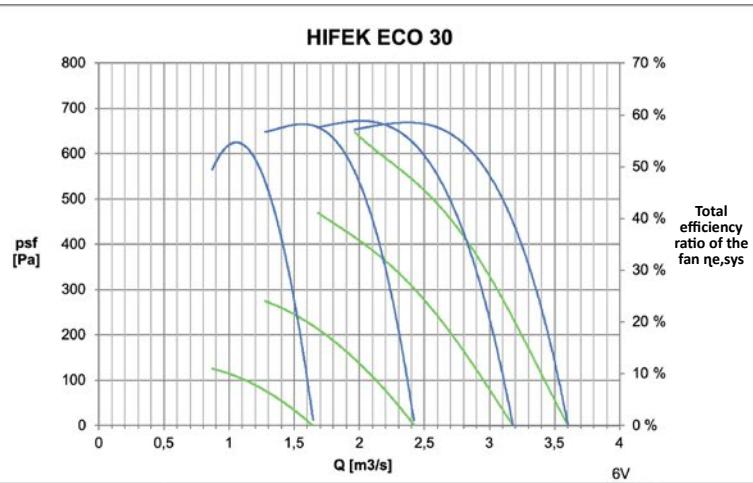

Attachment points:

HIFEK ECO 30 (gap 710 mm)

→ EC 18 / AC 18 / FEK 50

The sounds in the chart for the environment and suction duct are A-weighted total power levels.

Formula for the k value: $\frac{k \cdot \sqrt{\Delta p}}{1000} = [m^3/s]$, where Δp = differential pressure from the measuring nozzles of the fan (Pa)

HIFEK ECO 40

LVI number

LVI number (soundproof) 7805044

HiFEP LVI number* 7805106

*A support duct EI60, EI120 also available

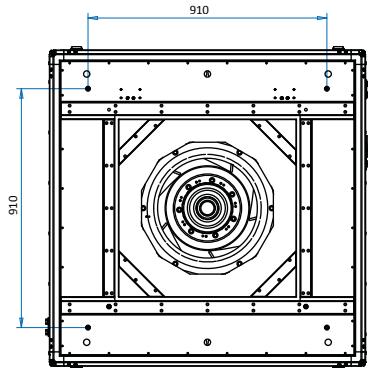

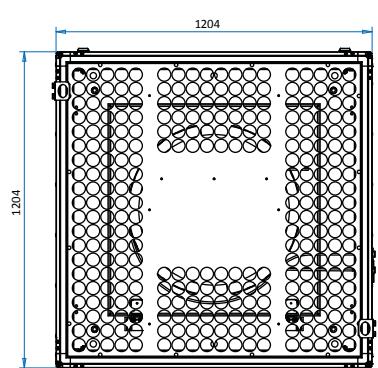

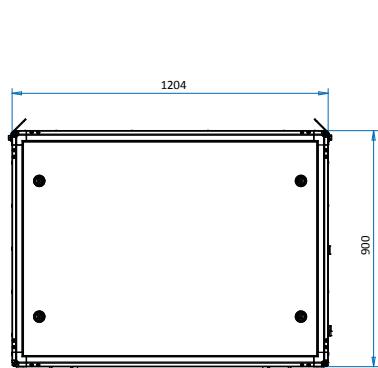

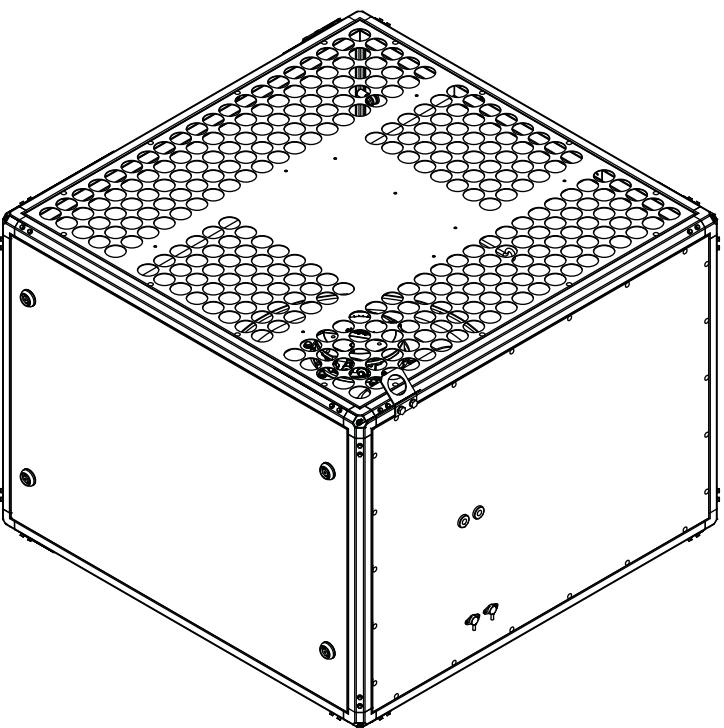

Nominal values:

Rotational speed	1,700 rpm
Power	4,400 W
Current	6.6 A
Voltage	3 ~ 400 V
k value	348
Mass	177.0 kg

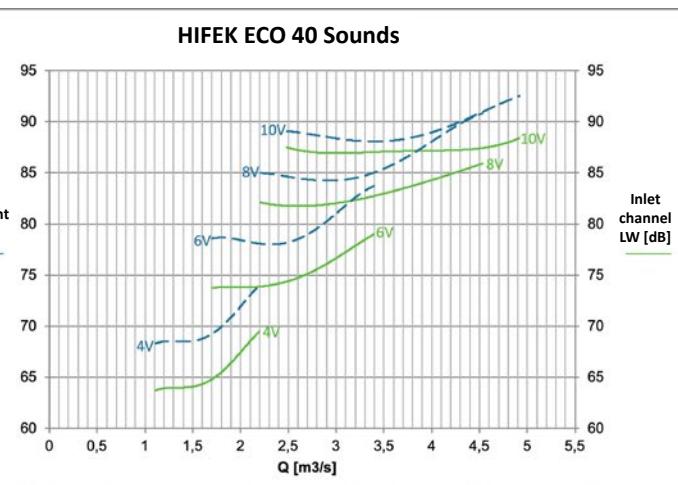

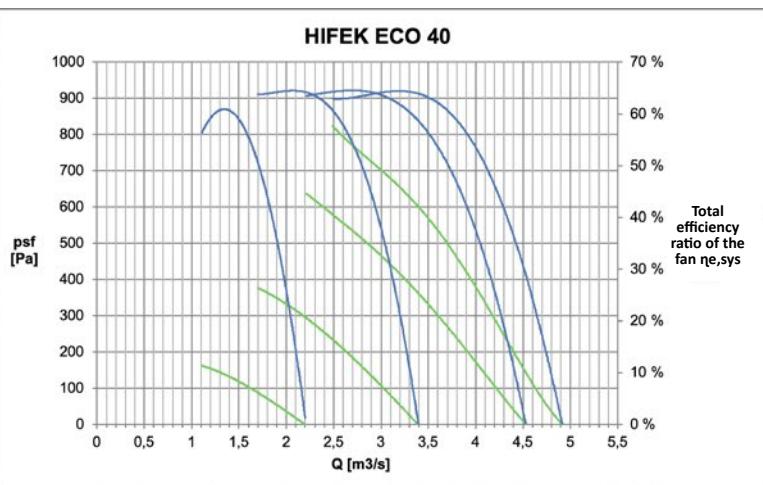

Attachment points:

HIFEK ECO 40 (gap 910 mm)

→ EC 24 / EC 36 / AC 24 / AC 36 / FEK 63

The sounds in the chart for the environment and suction duct are A-weighted total power levels.

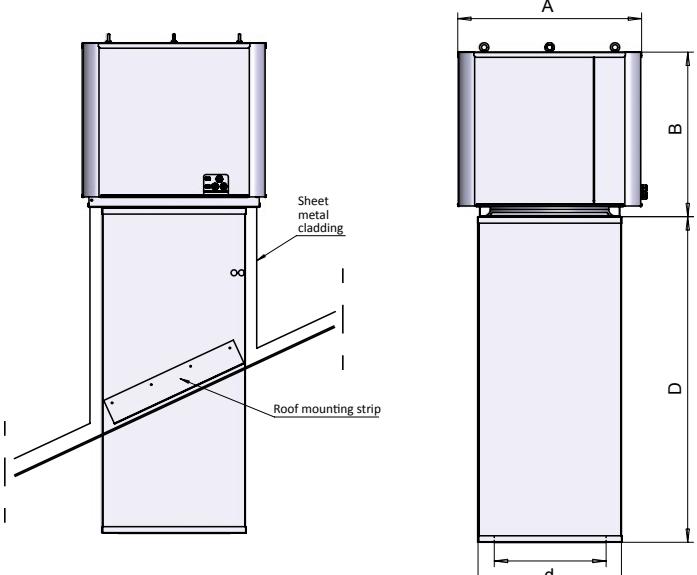

Formula for the k value: $\frac{k \cdot \sqrt{\Delta p}}{1000} = [m^3/s]$, where Δp = differential pressure from the measuring nozzles of the fan (Pa)

Accessories

Support duct – low pressure damper installed
