## Data Notice – connected product:

**Product name:** OBV® Marine

**Year of release:** 2024

## Data generated by product:

Sensor:	Data generated:	Format and estimated volume of data:	API/SDK provided for accessing or using data:	Data can be generated continuously and in real time:	Storage of data and intended duration of retention
CO2 sensor	Cabin air quality measurement, used also for occupancy detection in some projects	Timestamped measurement value, logging interval 1/min.	Yes (see below)	Yes	Yes, data to be storage on local server located in the vessel. Local data storage is continuous until server memory starts to run out. After this, data the oldest data is overwritten with newest data.
Humidity sensor	Cabin wet space humidity measurement	Timestamped measurement value, logging interval 1/min.	Yes (see below)	Yes	Yes, data to be storage on local server located in the vessel. Local data storage is continuous until server memory starts to run out. After this, data the oldest data is

Date 12.9.2025

					overwritten with newest data.
Occupancy sensor	Cabin occupancy	Timestamped measurement value, logging interval 1/min.	Yes (see below)	Yes	Yes, data to be storage on local server located in the vessel. Local data storage is continuous until server memory starts to run out. After this, data the oldest data is overwritten with newest data.
Temperature sensor	Room temperature	Timestamped measurement value, logging interval 1/min.	Yes (see below)	Yes	Yes, data to be storage on local server located in the vessel. Local data storage is continuous until server memory starts to run out. After this, data the oldest data is overwritten with newest data.

Note! Koja Oy customizes product deliveries for each customer, so the user's particular product may include only some of the above sensors; the above, exhaustive list assumes that all possible sensors are provided for the user's product.

**Accessing data:** Data can be accessed locally via vessels monitoring computer. Data can be transferred to external services if agreed separately.

Date 12.9.2025

**Erase of data:** Can be deleted locally, see monitoring system operation instructions.
